Y5 Ocean Maths

22.09.26
24.09.26

Today in Ocean Maths we are learning about numbers and number problems.

We are going to recap our knowledge of ordering numbers and solving number problems.

What are the names of the different place value columns?

Million	Hundred Thousands	Ten Thousands	Thousands	Hundreds	Tens	Ones
M	H Th	T Th	Th	H	T	O

Task 1: Last person standing

Write a 5-digit number on your whiteboard.

The teacher will read out a fact about a number. If it relates to your number you must sit down.
Example: If your number has a 5 in the ten thousands column, then sit down.

Last person standing wins.

Task 2: What is my number?

Person A: Think of a number between 0-100

Person B: Ask your partner questions to establish what their number is

Examples

- Is your number less than 50?
- Is your number an even number?
- Is your number in the 6 times tables?

Extension: Complete with numbers up to 1000, 10,000,100,000

Task 3: Higher or lower

(In booklet)

We will need:
6 counters in one colour and
6 in another colour.
Pencil
Paperclip
