

A decorative border surrounds the central text, composed of various mathematical symbols and numbers in different colors. The top border includes a blue plus, orange divide, black 1, red minus, green equals, pink multiply, black 9, red minus, orange divide, blue plus, and black 3. The right border includes an orange divide, black 5, blue plus, pink multiply, red minus, and orange divide. The bottom border includes black 6, orange divide, blue plus, black 8, red minus, green equals, pink multiply, black 7, green equals, black 2, and orange divide. The left border includes pink multiply, green equals, black 4, pink multiply, blue plus, and black 6.

Y3 Ocean Maths Autumn 1

A decorative border surrounds the text, featuring various mathematical symbols and numbers in different colors. The top border includes a blue plus sign, an orange division sign, a black number 1, a red minus sign, a green equals sign, a purple multiplication sign, a black number 9, a red minus sign, an orange division sign, a blue plus sign, and a black number 3. The left border features a purple multiplication sign, a green equals sign, a black number 4, a purple multiplication sign, a blue plus sign, and a black number 6. The right border features an orange division sign, a black number 5, a blue plus sign, a purple multiplication sign, a red minus sign, and an orange division sign. The bottom border includes a black number 6, an orange division sign, a blue plus sign, a black number 8, a red minus sign, a green equals sign, a purple multiplication sign, a black number 7, a green equals sign, a black number 2, and an orange division sign.

Today in Ocean Maths we are learning
about comparing and ordering numbers

We are going to recap our knowledge of
comparing and ordering by completing a
few maths games and activities.

What does it mean to compare?

When we compare numbers we are recognising whether they are larger, smaller or equal to each other.

A decorative border surrounds the text, featuring various mathematical symbols and numbers in different colors. The top border includes a blue plus sign, an orange division sign, a black number 1, a red minus sign, a green equals sign, a purple multiplication sign, a black number 9, another red minus sign, another orange division sign, a blue plus sign, and a black number 3. The right border features an orange division sign, a black number 5, a blue plus sign, a purple multiplication sign, a red minus sign, and an orange division sign. The bottom border includes a black number 6, an orange division sign, a blue plus sign, a black number 8, a red minus sign, a green equals sign, a purple multiplication sign, a black number 7, a green equals sign, and a black number 2. The left border features a purple multiplication sign, a green equals sign, a black number 4, another purple multiplication sign, a blue plus sign, and a black number 6.

Warm up:

Use your dice and roll 3 times to create a 3-digit number
Can you think of a number **greater** than your number?
Can you think of a number **less than** number?

Write these on a whiteboard using the symbols

Example: **251 > 192**

192 < 251

A decorative border surrounds the text, featuring various mathematical symbols and numbers in different colors. The top border includes a blue plus, orange divide, black 1, red minus, green equals, purple multiply, black 9, red minus, orange divide, blue plus, and black 3. The right border includes orange divide, black 5, blue plus, purple multiply, red minus, and orange divide. The bottom border includes black 6, orange divide, blue plus, black 8, red minus, green equals, purple multiply, black 7, green equals, and black 2. The left border includes purple multiply, green equals, black 4, purple multiply, blue plus, and black 6.

Activity 1: Highs and lows (Booklet)

Place number cards face down

Choose 3 number cards each

One person spins the spinner

Using your cards, make a **high** or **low** 3-digit number

Whoever has the highest or lowest number wins.

We will need:

- Number cards
- Pencil
- Paperclip

A decorative border surrounds the central text and list. It features a variety of mathematical symbols and numbers in different colors and sizes. The top border includes a blue plus, an orange divided-by, a black 1, a red minus, a green equals, a pink times, a black 9, a red minus, an orange divided-by, a blue plus, and a black 3. The right border includes an orange divided-by, a black 5, a blue plus, a pink times, a red minus, and an orange divided-by. The bottom border includes a black 6, an orange divided-by, a blue plus, a black 8, a red minus, a green equals, a pink times, a black 7, a green equals, and a black 2. The left border includes a pink times, a green equals, a black 4, a pink times, a blue plus, and a black 6.

Activity 2: Three together (Booklet)

- Decide who will have which colour counter
- Put number cards face down and each person to pick 2
- Place cards on booklet next to the printed '5' number card
- Place your colour counter on that number on the grid.
- The aim is to get 3 on the same row or column to win.
- They do NOT need to be directly next to each other.

We will need:

- Number cards (0-9)
- Counters (2 colours)
